The following is an examiner's statement of reasons for allowance:

The IDS filed on 06/04/01 has been considered. The Thiel et al abstract (Ref BL) shows that "Antibodies were produced against a peptide representing the NH₂-terminal part of the protein" (i.e. the MASP-2 protein). The reference is not cited against the instant claims because it is deemed nonenabling, due to a lack of any disclosure of the amino acid sequence of the peptide used to produce the antibodies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The drawings filed 6/29/05 have been approved by the examiner.

Claims at allowance have been renumbered with claims 41 and 43 having been inserted after claim 22, and with claim 45 having been inserted after claim 26.
